## PROFESSIONAL SUMMARY

Experienced front-end developer with a Bachelor's degree in Computer Science and expertise in **HTML5, CSS3, JavaScript**, and **modern web technologies**. Skilled in **responsive design, cross-browser compatibility**, and **front-end frameworks like Vue and React**. Proficient in **Bootstrap, Git, Tailwind** and **CSS preprocessors like SCSS**. Strong focus on UI/UX design, accessibility, and delivering high-quality web applications. [Portfolio](#)

## EDUCATION

Bachelor 2016 - 2020  
October 6 University, Computer Science and Information Technology

## EXPERIENCE

**Senior Front End Developer** Feb 2025 - Present  
Foodics, Remote

- Architected performant (Vue.js, React) applications, optimizing SSR with (Nuxt, Next) and advanced dynamic routing.
- Led mentoring sessions on Composition API, TypeScript, and scalable design systems
- Conducted deep-dive code audits to enforce architecture patterns and enhance test coverage.
- Rolled out reusable modules that accelerated team velocity across multiple verticals.
- Championed knowledge-sharing around cutting-edge React practices and frontend tooling.

**Senior Front End Developer** July 2023 - Feb 2025  
Wakeb Data, Egypt

- Engineered maintainable UIs with (React, Vue.js), elevating app responsiveness..
- Standardized component-driven development across projects to reduce delivery time.
- Reviewed and refactored legacy code for performance and modularity.
- Provided hands-on coaching to developers transitioning to modern React patterns..

**Senior Front End Developer** Dec 2022 - Jul 2023  
Orca Vision, Remote

- Delivered composable and scalable React interfaces leveraging atomic design and global styles.
- Established shared schemas and state logic across apps to unify development standards.
- Drove improvements in app architecture through modular component strategies

**Web Developer** Dec 2022 - Jun 2023  
Advance World Technologies, UAE

- Built SEO-optimized interfaces with React and fine-tuned rendering for speed.
- Integrated RESTful and GraphQL endpoints with robust reactivity and fallback handling..
- Deployed automated testing suites using Vitest and Cypress for CI stability.

**Front End Developer** Jan 2022 - Dec 2022  
Smart Technologies, Egypt

- Engineered maintainable UIs with React, elevating app responsiveness..
- Migrated codebase from Vue 2 to Vue 3 using Composition API and type inference.
- Assembled dynamic UI patterns via scoped slots and reusable directives.
- Supported dashboards with third-party integrations and advanced data visualizations..

- Contributed to high-traffic React, Vue web applications, focusing on accessibility, responsiveness, and core web vitals.
- Instituted component-driven development using Storybook, increasing consistency and reducing QA effort.
- Played a pivotal role in identifying performance bottlenecks and implementing asynchronous rendering strategies

- Led front-end implementations using Vue.js and SCSS, integrating responsive design and mobile-first UX principles.
- Reduced bundle size and enhanced rendering speed through tree-shaking and optimized asset management.
- Participated in sprint planning and architecture discussions, ensuring alignment with Agile practices and business goals

## **TECHNICAL SKILLS**

---

- |                                       |   |
|---------------------------------------|---|
| • HTML5, CSS3 (SCSS - Tailwind)       | • WebSockets & real-time updates  |
| • JavaScript - jQuery                 | • Micro frontends architecture  |
| • TypeScript                          | • Problem-solving   |
| • Vue, React                          | • Strong communication with designers, product managers, and backend developers |
| • Vex - Pinia                         | • Agile/Scrum experience  |
| • Bootstrap, Vuetify, Element, Shadcn | • Responsive design, Git, cross-browser compatibility                           |
| • Pug.js, Gulp.js                     |   |
| • Ajax - Json                         |   |
| • Version control                     |   |
